

# Via ferrata Hirschinger

## Character

Interesting route across the towers of north ridge to the Hirschkarspitze. All difficult passages that are often very steep and exposed, can be easily bypassed east sided or left via different exit options. Small rope bridges, a rock hole and a flying fox guarantee a lot of fun and action.

## Equipment for via ferratas

Climbing harness, via ferrata protection and helmet are absolutely necessary! For beginners we recommend the attendance of a mountain guide!

## Scale of difficulty

A: easy | B: moderately difficult | C: difficult | D: very difficult | E: extremely difficult

## Attention

There is danger to life in via ferratas during thunderstorms! Be aware of rockfall due to antedates!

Mountain rescue emergency call: 140

Red Cross emergency call: 144

**Enter at your own risk!**
