

Climbing wall

Character

The climbing wall on the Schlossalm offers the opportunity to try climbing on the mountain at an altitude of approximately 2,000 meters. Seven different climbing routes on the almost 8-meter-high wall allow the perfect introduction to the sport of climbing on the natural rock. Five of the seven fixed climbing routes are „top rope“, which means equipped with a fixed rope.

Equipment for via ferratas

Climbing harness, via ferrata protection and helmet are absolutely necessary!
For beginners we recommend the attendance of a mountain guide!

Attention

There is danger to life in via ferratas during thunderstorms! Be aware of rockfall due to antedates!

Mountain rescue emergency call: 140

Red Cross emergency call: 144

Enter at your own risk!

Start and finish point

Summit station Schlossalmbahn
