

Rope bridge

Character

Another highlight of the Schlossalm is the rope bridge, which is stretched between two rock ledges. It provides a connection from the motor skills path to the Schlossalmblick viewing platform and leads over the climbing garden. The rope bridge is about 40 meters long and is at a height of about 12 meters.

Equipment for via ferratas

Climbing the bridge is only possible with the appropriate climbing equipment.

Attention

There is danger to life in via ferratas during thunderstorms!

Mountain rescue emergency call: 140

Red Cross emergency call: 144

Enter at your own risk!

Start and finish point

Summit station Schlossalmbahn
